

**GENERATE BACKUPS &  
PERFORM RECOVERIES**

An ingenious recovery solution for SharePoint, Recovery Manager empowers the IT administrator to perform a complete SharePoint farm restore and item-level granular recovery. It makes individual documents, lists, document libraries, sites, and workspaces recoverable for IT administrator, by empowering them to locate, delete, modify, and restore these SharePoint documents with ease.

## Key Features

### Granular and Flexible Restore

Recovery Manager can restore data back to its original location, from a different location in the same or different SharePoint farm, saving documents and entire document libraries from getting lost.

### Recovery with Zero Data Loss

It restores the content in a way that it is hard to tell the difference between the original and the restored content.

### Quick Recovery

Time is critical in most of the restore operations. This recovery solution provides quick recoveries, mitigating the possible dependencies and delays in the process.

### Simple, Unified and Repeatable Recovery Process

Recovery Manager's intuitive Management Console requires no special skills, except for the basic SharePoint knowledge to locate and restore the data. It performs seamless integration with SharePoint recycle bins and the backup software, bringing same, simple and repeatable process for recovery to IT administrators

## Restore the Lost Scenario

### Emergency Access to Critical Data

Recovery Manager allows you to quickly browse backup content and retrieve only the data you need, even when the original SharePoint site is no longer available. You can get business-critical documents or even sites back online before the entire server farm is backup and running.

### Backup Storage Efficiency

Businesses need backup solutions that use storage space efficiently, not creating unnecessary duplication. Recovery Manager for SharePoint allows for granular data recovery from full or differential backups of the complete SharePoint content database, ensuring storage efficiency.

### Farm Backup and Recovery

Recovery Manager for SharePoint provides a quick way to create farm backups and restores all data, services and configurations in case of a disaster recovery, whether it be a single document or the entire SharePoint farm.

## You Are Empowered

- Transform your SharePoint into a business-critical platform with chaos control in your hands.
- Regulate migrations, customizations, and management by managing risk, time, cost and complexity.
- Empower the site owners with the ability to self-serve, and ease the work-load on the IT.
- Streamline permissions, backup and recovery, reporting, compliance tasks, and storage management.
- Enforce migrations with Zero IMPACT.
- Safely delegate migration and management participation to site owners
- Quickly deliver Custom Applications, which are easy to support, maintain, and upgrade.
- Meet a wide range of business requirements, and reduce the backlog.
- Make your own customizations quickly and safely.
- Contribute in the processes: migration, consolidation and restructuring.
- Participate in the management of content

## Feature Checklist

- Native SQL and SharePoint backups
- Microsoft Systems Center DataProtection Manager
- AppAssure Backup, Recovery and Replication
- LiteSpeed for SQL Server
- Integration with third-party backup solutions

## System Requirements:

### Platform

Intel® x86, 1GHz processor (x86, x64)

### Operating Systems:

Microsoft® Windows® XP SP2 or later

Microsoft® Windows 7

Microsoft® Windows Server® 2003 SP1 or later

Microsoft® Windows Server 2008

Microsoft® Windows Server 2008 R2

Microsoft® Windows Server 2012

### Additional Software & Services

Windows SharePoint Services (WSS) version 2.0

Windows SharePoint Services (WSS) version 3.0

SharePoint Portal Server (SPS) 2003

Office SharePoint Server (MOSS) 2007

Microsoft SharePoint Server 2010

Microsoft SharePoint Foundation 2010

Microsoft SharePoint Server 2013

Microsoft SharePoint Foundation 2013

## About AgreeYa

AgreeYa is a global systems integrator delivering competitive advantage for its customers through software, solutions, and services.
